Vu One

Login to your
entire enterprise.

Whether you run a single bulk plant or a multi-terminal operation, collecting data one location at a time can be a long, strenuous process. **VuOne*** connects to each of your existing Vu terminals and combines them into one centralized, cloud-based system. Login just once to an easy-to-use web interface to access all of your locations, all from the comfort of your computer.

Why VuOne?

Designed with your enterprise in mind.

Included with your existing Vu software:

Manage All Inventory Transactions
What goes in, what comes out and what's already there.

Streamlined Driver Access
Drivers receive Card, ID or PIN access to enter facilities.

Multiple Export Types
Print all your reports, so you know who delivered what, when and how much.

Real-Time Delivery Status
Get alerted and never miss a delivery again.

Print PDF Bill of Lading
Required by the Ministry of Transportation.

User-Friendly Web Interface
Quick and easy to use.

Links to Existing Accounting System
Easily export data to the back office for reporting purposes.

24/7 Online Access and Technical Support
Access your data and reporting anytime.

Complete Database Management**
Edit drivers, customers, trailers and more.

Set Product Allocation Limits**
For drivers, customers and trailers.

Total Compliance Management**
Prevent use with an expired driver's license, trailer certification or insurance certificate.

VuOne Benefits:

Cloud-Based Software
Data from all locations is stored in one secure system.

Anywhere Access
Use any web-enabled device from anywhere in the world.

Centralized Data
Login once for all of your data in one place.

How It Works

Connecting every site, no matter the distance.

Terminal A
Terminal C
Terminal B
Terminal D
End User
VuOne
Terminal E
Terminal G
Terminal F
Terminal H

What Our Clients Say

"

One of our subsidiaries operates locations across Ontario, but our head office is in Calgary, Alberta. If it wasn't for VuOne, it would be next to impossible to collect the data we need in a timely enough manner. Now all we have to do is log onto the software, and it's like we're there at each location."

Parkland Fuel Corporation
Calgary, AB

About GVM Integration

A relationship that works.

At GVM Integration, we're all about partnership. Our interface technology creates partnerships between product delivery hardware and accounting software for companies across the petroleum industry; and our people build lasting partnerships with a wide diversity of clients based on trust. It's our belief that real customer service starts with listening, not selling, so we continue to innovate and stand by 24/7 to address our clients' needs. From development to configuration to operation, GVM Integration is your data integration authority. Call or visit us online to learn how we can help bring things together like never before.
